

## Perfect protection of the copper surface

Lead-free coatings at low temperatures enable superior solderability.

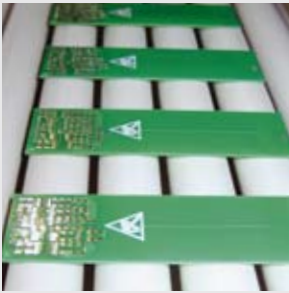

### Areas of application

- Conventional and high temperature OSP
- Immersion Silver
- Immersion Tin

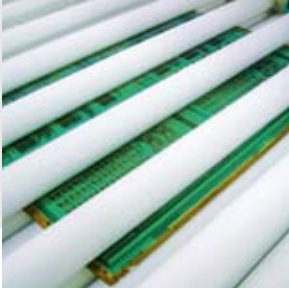

### Features and benefits

- Operating elements clearly placed and easily accessible
- Specific designed fluid dynamics for uniform results
- Laminar flow treatment with little turbulence
- Uniform surface coating
- Inline cartridge filtration
- Small sumps with sloped bottoms to drain

Transport  
small boards

Transport  
large boards
